WINE CHILLER SPECIALIST

The history of GRUBEL...

For years, we simply kept our wines in racks on the floor, away from direct light and heat. We drank them long before they could be harmed, and we really liked them there because we enjoyed looking at them. We didn't think of wine as something to be bought and put away. But as we understand more about wines, we understand why a proper storage is needed.

Wine is a living and breathing thing, and like a person it goes through stages of infancy, maturity and old age. Some wines reach maturity very quickly while others are heartier and need a decade or two for each facet of the wine to join together in harmony. Drinking wines that are a touch young can still be enjoyable, but sometimes you'll realize that they have potential to be so much more.

Since then, wine lovers and connoisseur have come a long way in understanding the important need for proper wine storage.

Since 2007, GRUBEL have been in the forefront, providing wine storage, both for the F&B and individual wine collectors, a brand trusted by the wine distribution fraternity. Make the right choice to store your precious wine in pristine condition. Select from our wide GRUBEL range of wine storage cabinets.

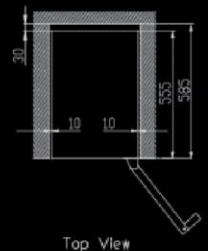

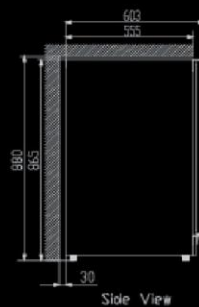

GWC-ST34SS

Wine Storage Cabinet (Free Standing / Built-in)

Features:

- Max Loading Capacity (750ml) : 34 Bordeaux Bottles
- Humidity Controlled
- Single Temperature : 5°C - 18°C
- Power Input : 74W
- Seamless Stainless Steel Glass Door
- Digital Temperature Control and Display
- 6 Full Wooden Shelves with SS Trim
- Adjustable Feet
- Cabinet Colour : Black
- Brushed Aluminium Rod Door Handle
- Noise Level : 43-45db
- Rated Voltage : 220-240V 50Hz
- Refrigerant Type : R600a
- Carton Dimension (mm) : (WxDxH) 415 x 670 x 895
- Body Dimension (mm) : (WxDxH) 380 x 603 x 885
- Interior LED Light
- Net Weight : 36.0kg
- Gross Weight : 38.0kg

Retail Price **RM 3,888.00**

Tips of storing wines...

KEEPING IT IN THE DARK

- Exposing to direct sunlight, fluorescent lights, UV rays can harm the structure and will create unpleasant smell and taste of the wines.

STORE THE BOTTLES ON THE SIDE

- This prevent the corks from drying and stop the air from entering the bottle, preventing spoilage.

KEEP TEMPERATURE CONSISTENT

- Wine storage temperature should not be above 24°C for a long period as the wines will oxidise over time. Ideally, the temperature for various wines in the storage should be between 12°C-16°C. This is where a good wine storage comes in.

DO NOT MOVE THE WINES

- Store them in a way you don't have to move many bottles in order to reach a bottle to drink.

KEEP THE HUMIDITY AROUND 70-75%

- This keeps the cork from drying. Use humidifying techniques like a small container of water, if needed.

ISOLATE THE WINE

- Remember that wine "breathes". Do not store wine with other substance that emit strong smell. The smell will penetrate the corks and taint the wines.
